

7,000+ Spoken/Written | 300+ Signed | One Platform.

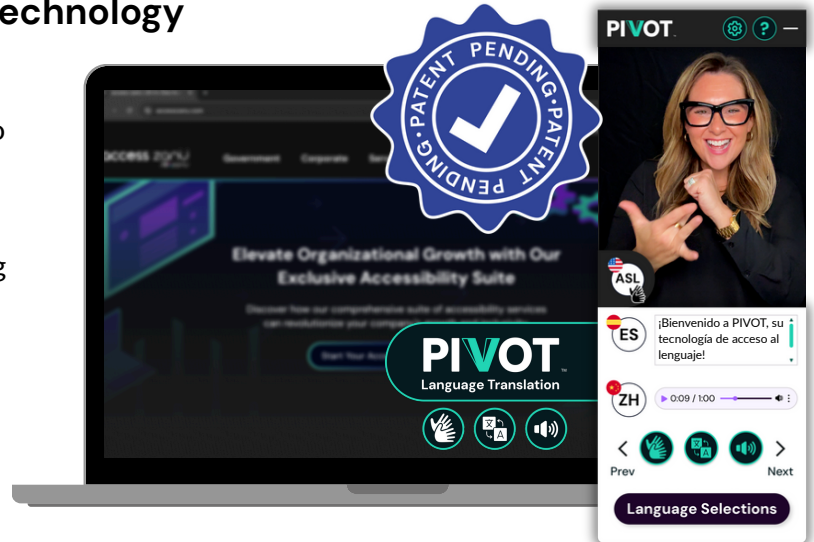

PIVOT
Language Translation

PIVOT: The Future of Language Access Technology

PIVOT is the first language access technology that embeds accessibility right where your information lives. No duplicate websites. No third-party dependencies. No expensive rebuilds.

With a single line of code, PIVOT integrates seamlessly into your existing digital systems—instantly transforming them into inclusive, multilingual experiences.

Every piece of content becomes accessible in every format and every language—video (signed), audio (spoken), and text (written)—bridging more than 7,000 spoken/written and 300 signed languages worldwide.

Key Features:

Triple-Modality Access:

Make information accessible in Video, Audio and Text.

VIDEO

AUDIO

TEXT

Built at the Source:

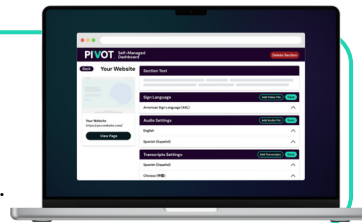

Language access embedded directly into your digital platforms, no duplicate pages, rehosting, or third-party dependency.

Seamless Integration:

Compatible with any digital interface, including websites, mobile apps, kiosks, and even printed materials through QR code integration.

Self-Managed Dashboard:

A powerful, intuitive interface that allows your organization (or your translation partner) to manage, edit, and publish translations in real time.

Compliance Ready:

Built to support ADA, Section 508, and European Accessibility Act (EAA) requirements.
